*The Psychodynamic Diagnostic Manual, Second Edition (PDM-2) Research Grants*

Dear Colleagues,

A few months ago we announced on the list an application process for small research grants made possible from royalties for the PDM-2. We are pleased to report that the evaluation committee has awarded four grants of \$15,000 each to the following researchers: **Annalisa Tanzilli** at Sapienza University in Rome; **Marko Biberdic** at the University of Wollongong in Australia; **Ken Levy** at Penn State University; and **Nicole Cain** at Rutgers University. Additionally, with the support of Jeff Guenzel at the Interdisciplinary Council on Development and Learning (the late Stanley Greenspan's organization), we were able to award \$8,000 to **Alexandro Fortunato** at Sapienza University in Rome. There were many excellent applications. We will repeat this process in future years as our funds allow.

Vittorio Lingiardi and Nancy McWilliams
